

Chairman of the Board's Message

I want to congratulate MASCA on its 31st anniversary. It has certainly come a long way since its founding 31 years ago. We should be proud accomplishments that we have made together all through these years.

AS we reminisce the past and remember those who have worked hard to make MASCA what it is today, we must rededicate ourselves to the ideals that this organization has been founded upon - that of fostering a friendship and camaraderie among us here in the US and extending the same spirit to our cabalens in the Philippines

As you might already know, MASCA's scholarship program in Macabebe started this year and it is off to a good start. But it is my humble belief that MASCA can do more by expanding the program so that more of our less- fortunate but deserving young cabalens can realize their God-given potentials. Education I believe is tie best gift that we can share because of its lasting impact and its enormous potential to improve the lives of so many people.

To insure the continued success of the organization, we need to look into the future. We need to involve our young in all MASCA activities and as Pampaguenos we should provide our children a constant window to our magnificent culture while giving them the avenues to prosper here in the US.

Again, congratulations.

Jose 'Peping' Sabado III
Chairman of the Board
